Letter of Reference

To Whom it may concern

Following a successful tender, we have established a contract in September 2023 with the company SAFENESS for the provision of Drilling HSE Advisors for an onshore drilling and workover campaign.

SAFENESS management provided a wide range of HSE professional profiles that exceeded our requirements. The profiles came with high experience in drilling operations and unmatched skills.

We have conducted several technical interviews and selected two candidates that have been performing an excellent job in assisting and monitoring the rig operation, coaching the crews, leading safety meetings and proposing innovative HSE solutions throughout the entire operation.

Based on all of this and more, We recommend with no hesitation the company SAFENESS for the provision of highly skilled HSE professionals to any client in the oil and gas industry.
